DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 10 is rendered vague and indefinite by the phrase "culturing a plurality of yeast cells in the presence of an alternating electric field." It is unclear whether the plurality of yeast cells in the presence of an alternating electric field has been modified. Therefore applicant is suggested to insert in claim 10, lines 7 after the term "antigen levels", the phrase "as compared to yeast cells not having been so cultured" to indicate the plurality of yeast cells in the presence of an alternating electric field has been modified.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 1654

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-10 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-13 of copending Application No. 10/717,158, claims 1-13 of copending Application No. 10/717,137 and claims 1-11 of copending Application No. 10/717,135. Although the conflicting claims are not identical, they are not patently distinct from each other because in both cases, the claims are drawn to a composition comprising a plurality of yeast cells cultured in the presence of a similar alternating electric field which encompass the same and/or similar strains therein.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 1-10 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over Claims 1-9 of U.S. Patent 6,709,849. Although the conflicting claims are not identical, they are not patentably distinct from each other because in both cases, the claims are drawn to a composition comprising a plurality of yeast cells cultured in the presence of a similar alternating electric field which encompass the same and/or similar strains therein. Further, the instantly claimed invention encompasses the claimed invention of 6,709,849.
